

# Q1 2026 NEWSLETTER

DEAR FRIENDS,

We are grateful for the ways God continues to move through this ministry—and for your faithful support in making it possible.

This season has also brought personal challenges. After recent scans showed the need for further treatment for Tom's cancer, we are seeking next steps while starting on the third cycle of chemotherapy and continuing to trust God's leading.

Through it all, one question remains: ***Do you trust Me?***  
And our answer is still the same: ***Yes, Lord.***

With gratitude,  
Thomas & Lita

## EXPANDING IMPACT THROUGH OUTREACH

In February, we returned to Rwanda for a month and led a team from the US to serve in rural villages and within the prison system—places where dental care is often nonexistent.

Through these outreaches:

- Patients received much-needed treatment and relief
- The Gospel was shared alongside care
- Local partnerships continued to grow

In one village alone, we continue to see lasting fruit from past outreaches, including three new small groups formed to disciple about thirty new believers who came to faith.

This is why we go—bringing both healing and hope.

## BUILDING FOR THE FUTURE

Construction on Phase II of the HOPE Dental Center is moving forward.

This phase includes:

- Volunteer housing
- A dental laboratory
- Training and meeting spaces

We are prayerfully anticipating completion this summer. Every step forward brings us closer to a fully operational center that will train local dentists and expand access to care across Rwanda.

## GROWING THE TEAM

God continues to raise up individuals to serve.

- Josianne, once a patient, is now a full-time team member being trained in dental assisting
- Jean Pierre has joined to support operations and logistics

These are the stories your support makes possible—lives changed not just through care, but through opportunity and purpose.

## NEW PARTNERSHIPS, GREATER REACH

God is opening doors for new partnerships that will expand our impact.

Recently, we began working with Arise Rwanda, a nonprofit developing a hospital near Lake Kivu. Our team is helping design their dental clinic for long-term sustainability. These collaborations allow us to multiply impact beyond what we could do alone.

## LOOKING AHEAD: TRAINING THE NEXT GENERATION

One of our greatest priorities is launching the HOPE Dental Center training program.

This program will equip Rwandan dentists to serve their own communities—creating sustainable, long-term change.

While we continue to seek full-time missionaries to support our growing mission and working through government approval processes, we remain hopeful and ask for your prayers as we move forward.
